

478547

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY
REGION V

DATE: 29 MAY 1992

SUBJECT: DIOXIN SOLICITATION FOR THE ILLIANA SCRAP SITE AND THE
SHELBYVILLE SALVAGE SITE

FROM: JAN PELS, RSCC *J. Pels*

TO: ELENOR MC LEAN, SMO

Please solicit for 2,3,7,8-TCDD using the Illiana SAS request form for the following two sites:

Illiana Scrap Processing, Crete, IL Sampler: IEPA
Cerclis # ILD984791673 SSI/ZZ
6 soil, 2 ash, 1 soil performance evaluation sample, 1 soil blank

Shelbyville Salvage, Shelbyville, IL Sampler: IEPA
Cerclis # ILD984791699 SSI/ZZ
2 soils, 1 soil performance evaluation sample, 1 soil blank

Please solicit these two sites together; I realize that they will be assigned different SAS numbers. Samples for the Illiana site have already been collected and the samples for the Shelbyville site will be collected next week. Samples can be held until a SAS lab is awarded.

Please solicit labs that have previously had the 2,3,7,8-TCDD RAS contracts, and all other labs which have successfully analyzed dioxins under the SAS program in Region V. If you are aware of other Regional SASs for the 2,3,7,8-TCDD SOW analyses which were accepted by other Regions, the lab(s) that performed these SAS projects could also be included.

It is important that the labs solicited have previous experience either doing the PCDD/PCDF type analysis or the 2,3,7,8-TCDD analyses under the old SOW. It would be preferable to solicit only those labs who performed under the old 2,3,7,8-TCDD contracts since they would be uniquely qualified to perform the SAS since it requires the old RAS method.

Please call if you have any questions.

Thank you.
